Project Independence Blueprint Final Task Force Report [nuclear Energy] United States. Project Independence Interagency Nuclear Task Force 1974 This report contains the final technical analysis of the Project Independence Interagency Nuclear Task Force chaired by the Atomic Energy Commission. The task force was formed in April 1974 to provide estimates for the Project Independence Blueprint of the potential production capabilities of the nuclear industry and the resources necessary to achieve these levels of production. The task force evaluated several alternative strategies which assumed various levels of potential production. The report is organized into three sections. The first two sections consists of the introduction and the findings of the Task Force. The third section consist of topical discussions of the major resources (e.g., financial investments, manpower, and materials and equipment) required to achieve the projected production levels as well as subjects associated with nuclear power generation (e.g., environmental effects, public acceptance, research and development).

Advances in Endogenous and Exogenous Opioids Hiroshi Takagi 2013-10-22 *Advances in Endogenous and Exogenous Opioids* contains the proceedings of the International Narcotic Research Conference (Satellite Symposium of the 8th International Congress of Pharmacology) held in Kyoto, Japan on July 26-30, 1981. The conference provided a forum for discussing advances that have been made in the understanding of endogenous and exogenous opioids and tackled a wide array of topics ranging from novel opiate binding sites selective for benzomorphan drugs to the purification of opioid receptors and sequellae of receptor binding. Comprised of 156 chapters, this book begins with an analysis of the

interaction of opioid peptides and alkaloid opiates with mu-, delta-, and kappa-binding sites. The reader is then systematically introduced to biochemical evidence for kappa and sigma opiate receptors; the action of morphine and oxymorphone as partial agonists on the field-stimulated rat vas deferens; mechanisms of supersensitivity in the enkephalinergic system; and properties of the solubilized opiate receptor from human placenta. Subsequent chapters explore the biosynthesis of opioid peptides as well as their localization, release, and degradation; physiological and pharmacological actions of opioids; and the use of analgesia in acupuncture. Results of behavioral and clinical studies of endogenous and exogenous opioids are also presented, and the structure-activity relationships of opioids are examined. This monograph will be of interest to students, practitioners, and researchers in the fields of psychiatry and pharmacology.
