The North American Species of Whiteflies of the Genus Trialeurodes Louise May Russell 1948 This publication treats the species of Trialeurodes known from North America. In this region the genus is of particular interest because of its wide distribution, the number and diversity of its food plants, and the injuriousness of certain species. It is the largest aleyrodid genus known on the continent, and all species now known in the Nearctic Region presumably are indigenous to it or are Neotropical species whose northern limits extend into that Region. Characteristics of interest are modifications in papillae and in the vasiform orifice exhibited by some its members, and also the unusual parthenogenetic behavior of one of them.

Naval Blockades in Peace and War Lance E. Davis 2006-12-04 A number of major blockades, including the Continental System in the Napoleonic Wars, the War of 1812, the American Civil War, and World Wars I and II, in addition to the increased use of peacetime blockades and sanctions with the hope of avoiding war, are

examined in this book. The impact of new technology and organizational changes on the nature of blockades and their effectiveness as military measures are discussed.

Legal, economic, and political questions are explored to understand the various constraints upon belligerent behavior. The analysis draw upon the extensive amount of quantitative material available from military publications.
